About Us:

Peptide Technologies, Inc. DBA Éternelle Skincare Products has developed a luxury anti-aging skincare product line that incorporates a combination of our proprietary peptide based formulations and scientifically advanced collagens to enhance penetration into the skins surface and provide the appearance of youthful skin. Our skincare formulas are developed with proven scientific expertise and techniques to overcome modern day environmental stressors which include sun damage, natural aging and collagen loss. Our products are proudly made in the USA without animal testing and are certified vegan friendly, and are sulfate, paraben, phthalate and gluten free.

The Science of Our Products:

Éternelle has formulated a multi-step product line of facial regimens to help volumize, plump and smooth the skin while reducing fine lines, wrinkles and dark spots on the skins surface. Our approach to controlling and enhancing the skins natural ability to reproduce collagen is unique within the skincare industry. We do this by combining our proprietary blend of peptide formulas with existing ingredients found in nature to achieve maximum results. As we age, science can be our ally and the use of collagen peptides is one of the most effective methods to help reduce the signs of aging. Simply put, our peptide chains consist of amino acids that are small enough to absorb into the skin which then enable them to develop into larger amino acids. This synthesis is critical in forming proteins such as collagen which is the building block of your skin. These peptides are highly stable and their objectives are well-defined which makes them an extremely effective tool to brighten, fill and rebuild facial features and reduce visible signs of aging.

The abundance of collagen is key for the youthful appearance of skin as it provides suppleness and skin firmness. As we age, our collagen breaks down naturally into smaller amino acid chains that send messages to receptors to form more collagen. When combined with environmental aggressors such as sun damage, this process becomes less efficient and results in a reproduction slowdown. One of the first areas this happens is around the eyes and as such we have developed a 2 step formula to address these signs of aging. Eternelle's collagen peptide formulations work to assist in this process by sending more messages to receptors so that more collagen is formed. Peptides are organic compounds composed of a series of amino acids linked by a peptide bond. Peptide chains longer than a few dozen amino acids are called proteins. As a result, a peptide can be viewed as the ultimate "green as green" compound as it is not toxic.

Biosynthesis of peptides from a succession of amino acids are catalyzed and controlled by enzymes. Many hormones, antibiotics and other compounds that participate in life processes are peptides. Enzymes facilitate their construction and their lifetime by performing a clean up function once the peptide has done its job. It is helpful to think of a peptide as a ladder, with the rungs of the ladder representing the amino acids. It is the number of rungs of the ladder and their specific order that we have developed at Éternelle to perform a particular objective for the skin.

Our Daily Product Regimen:

1 ILLUMINATE Brightening Antioxidant Serum- Pigment Correcting Formula

Illuminate is the ultimate formula for uneven skin tone that addresses regulating the production of melanin. This potent hydroquinone-free formula prevents and corrects skin discoloration caused by UV damage and daily environmental stressors, post-inflammatory hyper-pigmentation and melasma. Uniquely created with a blend of potent skin lighteners and brighteners including Arbutin, Licorice, Azelaic Acid, and multiple forms of Vitamin C to inhibit and regulate melanin formation to normalize and correct pigment production while evening out skin tone and encouraging collagen synthesis.

2 REGENERATE Volumizing Antioxidant Serum- Vitamin C+ Collagen Booster

Regenerate is an intensive Vitamin C antioxidant hydra-serum created to resist and restore damage from aging, sun, stress and environmental exposure. It neutralizes free radicals in the skin and prevents the breakdown of collagen. It provides the highest clinically-tested percentage of stable Vitamin C, Ferulic Acid, Emblica, Vitamin E and Vitamin B5 to deliver the ultimate in skin hydration and volume while providing unmatched antioxidant support. This skin booster firms and smoothes while stimulating collagen production resulting in beautiful youthful skin.

3 HYDRATE Antioxidant Moisturizing Creme- Daily Collagen Renewal

Hydrate is a lightweight fast absorbing moisturizer for all skin types that targets visible signs of aging. It has been formulated with synergistic ingredients to nourish, protect and deeply hydrate the skin while improving the appearance of skin tone, texture and elasticity. This paraben-free formula improves suppleness, enhances firmness and addresses loss of elasticity. It contains the essential antioxidants Emblica, Vitamin E and Ergothioneine to give daily protection from UV radiation while helping to repair free radical damage and collagen breakdown in the skin to deliver dramatic and immediate results.

4 EYE HYDRATE Peptide Eye Restore Serum- Micro Circulation Booster

Eye Hydrate is step 1 in a targeted light-weight eye treatment that hydrates and soothes the delicate eye area. It was created to diminish the look of dark circles, puffiness, fatigue and fine lines and contains proven multi-functioning peptides to effectively treat these symptoms. The formula is complete with Shea Butter and Hyaluronic Acid to provide deep and long- lasting hydration while these additional antioxidants help protect skin from free radical damage, encouraging collagen reproduction for an eye area that looks brighter and more rested. It should be followed up with step 2, EYE INVIGORATE for best results and to further reduce chronological signs of aging.

5 EYE INVIGORATE Peptide Eye Repair Complex- Cellular Collagen Youth Serum

Eye Invigorate is step 2 in a highly concentrated peptide based eye complex that effectively combats the signs & symptoms of chronological aging while deeply hydrating and nourishing the delicate eye area. Our proprietary combination of peptides effectively works to repair cellular communication and boost the synthesis of Collagen I, III, & IV for a visible reduction in the appearance of fine lines and wrinkles around crow's feet. Invigorate works to regenerate, repair and protect the skin by preventing glycation and providing a youthful glow. Powerful antioxidants, proteins, amino acids and botanicals combine with Vitamins C & E and Green Tea Extract to protect and repair damaged skin caused by free radical and UV damage.

Éternelle's Advantages

We manufacture, market and sell a very unique facial skincare product line which is based on proprietary technology that took several years to develop. Our approach to skincare provides a targeted response so that the collagen peptides will have the opportunity to perform their objective in the way they were designed to fulfill- **Youthful Skin**. The method to reconstruct the skincare ladder and make it invisible to the destructive force of enzymes while allowing the natural ingredients to penetrate the skin is unique to Éternelle and its product line.
